EXAMINER'S AMENDMENT

1. After applicants filed an amendment on February 7, 2012 in response to the Final Office action of October 7, 2011, the Examiner sent out an advisory action on March 9, 2012 maintaining her 103(a) rejection on claims 50 and 51 and indicating an allowable subject matter of claims 54-57 that depend from claims 50 and 51. Attorney for applicants, Mr. Richard A. Sutkus, telephoned the Examiner on March 29, 2012 and requested an Examiner's Amendment to be made, which would incorporate the subject matter of claims 54 and 55 into the present claim 50 and 51, respectively. The Examiner accepted such request.

2. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on March 29, 2012, Mr. Richard A. Sutkus (attorney for applicants) requested an extension of time for 2 MONTH(S) and authorized the Director to charge Deposit Account No. 20-0090 the required fee of \$*** for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard A. Sutkus on April 5, 2012.

5. The application has been amended as follows:

In Claim 25, line 1, change "A process for producing" to --- A thermo-lithographic process using ---.

In Claim 25, line 5, change "a SAM" to --- said SAM ---.

In Claim 25, line 7, change "so as to change" to --- in a desired pattern so as to change selectively part of ---.

Cancel Claim 27.

In *each* of Claims 28, 29 and 31-35, line 1, change the claim dependency from "claim 27" to --- claim 25 ---.

In Claim 28, line 1-2, change "wherein in said pattern transferring step there is used a thermal treatment" to --- wherein said thermal treatment is ---.

In Claim 49, line 2, change "a self-assembled" to --- a heat treated self-assembled ---.

In Claim 50, line 7, between "aryl moiety," and "wherein said substrate", insert --- wherein said aryl moiety is a polycyclic aryl, and ---.

In Claim 51, line 7, between "aryl moiety," and "wherein said substrate", insert --- wherein said aryl moiety is a polycyclic aryl, and ---.

Cancel Claims 54 and 55.

6. The following is an examiner's statement of reasons for allowance: In Fig.4A-4C, Lahann et al (US 2003/0142901 A1) teaches a substrate surface having a nanolayer comprised of amphiphilic dimers (connected via an azo linkage), which upon exposure to UV light, go through a change in conformation of the azo groups from cis to trans. However, there is no indication or suggestion in Lahann that the nanolayer comprising the amphiphilic dimers is being exposed to UV light in a desired pattern so as to change selectively part of the nanolayer surface from the cis to trans form. Thus, Lahann does not teach or suggest present invention of claim 25. Lahann also does not teach present limitation of claim 49 with respect to the domain sizes exceeding 10^5 nm^2 after the heat treatment, present SAMs as described in claims 50 and 51, or the specific SAM of present claim 52. Even though Rong et al ("On the Importance of the Headgroup Substrate Bond in Thiol Monolayers: A Study of Biphenyl-Based Thiols on Gold and Silver", Langmuir 2001, vol.17, pg.1582-1593) teaches SAM of 4-(4'-methyl-biphenyl-4-yl)-alkane-1-thiol, the reference does not teach or suggest presently claimed heat-treated (or thermally treated) SAM of claims 49-52, which clearly has a different structural form from that of SAM which is not heat-treated (as demonstrated by applicants in Example 1 of present specification). Rong et al also does not teach or suggest present thermo-lithographic process of present claim 25 (as amended above). Lastly, in view of present amendment with respect to present claims 50 and 51 (as shown above), previous 103(a) rejection on claims 50 and 51 over Stolowitz et al'722 is hereby withdrawn because Stolowitz does not teach or suggest the polycyclic aryl group as now required in present claims 50 and 51.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sin J. Lee whose telephone number is 571-272-1333. The examiner can normally be reached on Monday-Friday from 9:00 am EST to 5:30 pm EST.
